

Marion County

Community Notice Regarding Mosquito Spraying

Marion County Mosquito Control Program is planning to use truck mounted aerosol sprayers throughout Marion County beginning on Wednesday, October 17, 2018 between dusk and 11:30 PM. The mosquito spray we use is BioMist 3+15 ULV. Information about the spray and its ingredients can be found at <https://www.clarke.com/biomist>. Biomist 3+15, which is designed to kill adult mosquitoes while posing no danger to people, animals or plants.

As with any pesticide, people should minimize exposure. If residents see a spray truck approaching, they are advised to go indoors for a couple of minutes while the spray dissipates. Residents are also advised to close windows facing the street.

Spraying will not be conducted with a ½ mile radius on beekeeper sites that have been reported to Marion County.

Questions related to spraying or questions on mosquitoes can be answered by calling the Marion County Mosquito Control Program at 843-275-6087.
